ABOUT

Product Designer with a background in backend development and science, focused on solving complex problems through systems thinking, user-centered design, and technology.

My path into Product Design combines analytical thinking, technical problem-solving, and user-centered design. Before transitioning into design, I worked in backend development with Java and Ruby, building a strong understanding of technical constraints, cross-functional collaboration, and how digital products are built.

I enjoy designing thoughtful digital experiences that balance usability, technical feasibility, and product goals, particularly in SaaS, AI, and systems-oriented environments.

SKILLS

Design: Product Design, UX/UI Design, Interaction Design, User Flows, Information Architecture, Wireframing, Prototyping, Design Systems, Responsive Design, Accessibility, Usability Testing, Figma, Adobe Illustrator, User Research (Primary & Secondary), User Personas, User Journeys, Microinteractions.

Development: Backend Development, Java, Ruby, Ruby on Rails, Spring Boot, SQL, Git/GitHub, Jira, Agile Collaboration.

Scientific Background: Field Research, Data Analysis, Geospatial Analysis, Scientific Problem-Solving.

DESIGN EXPERIENCE

UX/UI Design Practice - Neufische GmbH

Jun - Sep 2025

- Applied user-centered design principles to design digital solutions through research, wireframing, prototyping, and interface design.
- Designed user flows, wireframes, and interactive prototypes, balancing usability, accessibility, and technical feasibility.
- Structured user journeys, information architecture, and interface decisions to support intuitive and engaging digital experiences.
- Completed project-based design work across collaborative and independent projects, including a [Capstone Project](#), [E-commerce Website](#) and a Fitness App.

OTHER EXPERIENCE

Ruby Backend Developer | Surveyeah | Italy

Jul 2023 - Feb 2025

- Implemented end-to-end features based on user stories, adapting workflows and addressing technical challenges to support platform functionality.
- Maintained database and system reliability through updates, troubleshooting, and ongoing platform improvements.
- Performed maintenance, refactoring, and code improvements to enhance platform performance and maintainability.

Java Backend Developer | Accenture | Argentina

Sep 2022 - Dec 2022

- Developed and maintained backend services, implementing business logic to support reliable system functionality and data operations.
- Investigated and resolved QA-reported issues to improve system stability and performance.
- Provided technical support to team members, contributing to effective collaboration and problem-solving.

Java Backend Developer | Globant | Argentina

May 2021 - Aug 2022

- Investigated and resolved QA-reported issues to improve system stability, reliability, and performance.
- Supported the maintenance and refinement of client microservices, contributing to smoother business workflows and system functionality.
- Provided technical guidance and collaborated with team members to support effective problem-solving and delivery.

Teaching Assistant | National University of La Plata | Argentina

Nov 2018 - Apr 2022

- Guided students through structured analytical workflows to interpret complex scientific problems and evidence-based information during practical coursework.
- Facilitated group sessions, answered questions through virtual learning platforms, and provided one-on-one support to help students apply analytical methodologies.
- Reviewed practical assignments and provided feedback to strengthen critical thinking, analytical reasoning, and structured problem-solving.
- Translated complex scientific concepts into clear, step-by-step explanations tailored to practical activities and different learning needs.
- Delivered selected teaching sessions and supported course instruction in a remote learning environment

Geologist | Department of Hydraulics, Faculty of Engineering, National University of La Plata | Argentina

Sep 2015 - Mar 2016

- Conducted geological surveys and analyzed complex datasets to identify patterns, risks, and key findings.
- Integrated field observations and laboratory results to support evidence-based decision-making.

Geologist | BfU of Argentina S.A (Environmental consulting company) | Argentina

Mar 2015 - Sep 2015

- Conducted field inspections, mapping, and environmental sampling to support project assessments.
- Supervised field procedures and synthesized results to ensure data quality and structured analysis.

Geologist | LCV S.R.L (Oil Company Services) | Argentina

Aug 2014 - Feb 2015

- Conducted laboratory analyses and integrated multiple methodologies to interpret material properties.
- Synthesized technical findings to support project evaluation and decision-making.

Geologist | Cementos Avellaneda (Cement manufacturing and quarrying company) | Argentina

Oct 2012 - Mar 2013

- Conducted material analyses and synthesized data to support exploration and project evaluation.

EDUCATION

UX/UI Design & Research Bootcamp | Neufische GmbH | Germany

Jun - Sep 2025

Backend Developer Java - Ada | Argentina

Jul 2020 - Apr 2021

Ph.D. in Natural Sciences | National University of La Plata, Faculty of Natural Sciences and Museum | Argentina

Apr 2016 - Jul 2023

B.A. in Geology | National University of La Plata, Faculty of Natural Sciences and Museum | Argentina

Mar 2008 - Dec 2013

CERTIFICATIONS AND TRAINING

Agile Methodology Scrum | ADA | Argentina

Mar 2021

Fundamentals of Project Planning and Management | University of Virginia Darden School of Business | Online

Mar - Jun 2020
